SKORE
TRANSFORMATION RIGHT FIRST TIME

TARGET RPA AT EXACTLY THE RIGHT PROCESSES

Rapidly capture and agree business processes with Skore Digital Discovery platform. This unique approach is designed to be used in live capture workshops and quickly get all stakeholders engaged and aligned.

Apply the Robotic Assess tool to relevant steps in the process to reveal those most suitable for Robotic Process Automation.

"Targeting RPA at the wrong processes is one of the main reasons RPA fails to establish itself in organisations."

Ernst & Young – Get Ready for Robots report 2018

"Many organisations, having started by treating RPA as an experiment, are stuck and suffering from IT Issues, process complexity and unrealistic expectations"

Deloitte – Global RPA Survey

IMPROVE YOUR PROCESSES BEFORE YOU AUTOMATE

The RPA Assess tab summarises which parts of your process can be automated, and which should remain as manual.

Impacted roles are highlighted to help you plan the reorganisation of teams and assignment of work.

Process steps that require improvement before automation are listed along with improvement suggestions. This helps you target improvements, reduce process complexity, and prepare for automation.

SKORE
TRANSFORMATION RIGHT FIRST TIME
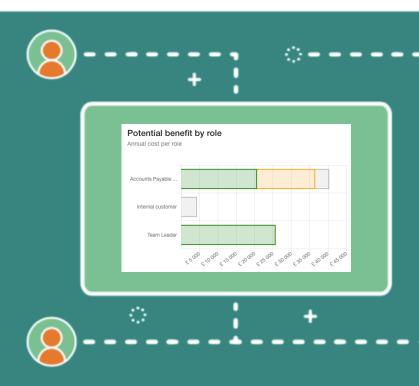

INSTANTLY BUILD A BUSINESS CASE FOR RPA

With Skore Robotic Assess you can capture volume and duration information against each step in a process. Once you have identified which process steps are most suitable for RPA, Skore will tell you the total cost of the process and the potential cost savings.

The business case is broken down by role and activity costs so you can decide how to redeploy your human workforce to more value adding work.

Potential benefit by role

"The Portfolio view allows our customers to manage a pipeline of RPA opportunities in their business and regularly report on progress."

Daniel Lawrence – CEO, Lawrence & Wedlock, sustainable and scalable RPA

PRIORITISE YOUR PORTFOLIO OF PROCESSES

You will quickly find numerous opportunities to apply Robotic Process Automation across your organisation. How do you stay on top of all these projects and focus your efforts most effectively?

The Portfolio view in Skore Robotic Assess provides an instant prioritised view of all the processes you have captured and assessed.

This helps you make informed decisions about which process to implement next and the cost savings you can benefit from.
